

OUR COMMITMENT GLOBAL FOOD SECURITY BY 2020

At DuPont, food security is at the heart of our priorities. Across the globe, DuPont is addressing food security with science-based innovations. We are building collaborations with businesses, non-profit organizations and governments, and working with local farmers and food producers.

DuPont 2020 Food Security Goals

In the spirit of “what gets measured gets done,” DuPont announced in 2012 corporate goals to enhance global food security that would be realized by the end of 2020. DuPont encourages all employees to do their part in making food more nutritious, safer and available to people everywhere.

Innovating to Feed the World. DuPont committed \$10 billion to research and development, and the introduction of 4,000 new products by the end of 2020. The work centers on developing innovations that will produce more food, enhance nutritional value, improve agriculture sustainability, boost food safety, extend food freshness, and reduce waste.

Engaging and Educating Youth. By the end of 2020, DuPont committed to facilitating 2 million engagements with young people around the world to transfer the knowledge of sustainable food and agriculture and the impact it will have on a growing population. DuPont has already exceeded this goal.

Improving Rural Communities. DuPont will work to improve the livelihoods of at least 3 million farmers and their rural communities through targeted collaborations and investments that strengthen agricultural systems and make food more available, nutritious and culturally appropriate. This is in addition to the work already being done by DuPont to enhance the lives of hundreds of millions of farmers through our normal business practices.
